Designed for speed LIFEBOOK S6410

Fully utilizing the latest Intel® Centrino® Duo processor technology, the ultra-mobile LIFEBOOK S6410 offers truly breathtaking performance. High flyers will appreciate the easy wireless connectivity – including embedded UMTS/HSUPA – for keeping in touch with base anytime and anywhere. And your colleagues can stay in the picture while you are on the road thanks to the integrated ConfCamera for effortless video conferencing. Representing the perfect traveling companion, the LIFEBOOK S6410 weighs in at just 1.7 kg, with its compact design incorporating an innovative 13.3-inch widescreen display. Furthermore, it includes a number of sophisticated features to extend battery life so you can remain productive throughout the entire business day. Wherever you decide to work.

MOBILE CONNECTIVITY

For wireless work

The new LIFEBOOK S6410 keeps you working efficiently and independently. With its embedded HSUPA transceiver, this professional notebook offers you wireless connectivity up to three times faster than UMTS at the touch of a button – anytime and anywhere. The integrated ConfCamera fully supports on-the-fly videoconferences, enhanced by built-in digital microphones that suppress ambient noise – equally useful when making VoIP calls. Optional Bluetooth means you can seamlessly connect to your peripherals and other mobile devices, and once back at the office, the dedicated port replicator instantly transforms your LIFEBOOK S6410 into a fully-fledged desktop PC.

COMPACT DESIGN

Work with style

Small, but perfectly formed, the new LIFEBOOK S6410 is sure to attract envious glances. The housing is as robust as it is elegant – thanks to its top-quality hinges and a magnesium lid, while ShockSensor technology protects your hard disk against sudden jolts. Should the worst come to the worst, one push of the RecoveryButton is all it takes to restore all your applications and files. Even the keyboard is designed to survive the odd spilt coffee. Its compact size and use of modern, lightweight materials means the LIFEBOOK S6410 weighs only 1.7 kg, yet still includes a 13.3-inch widescreen display. And like other members of its family, the LIFEBOOK S6410 offers the convenience of bay modules and a port replicator for flexibility and expandability.

Main features and benefits of
Intel® Centrino® Duo processor technology:

- Enhanced performance
- Extended battery life
- Thin and light form factor
- Intel® Turbo Memory technology for faster loading times and hard drive efficiency

ENERGY EFFICIENCY

For continued work

Powerful yet frugal, the LIFEBOOK S6410 lets you work a full business day independent of any power source. In addition to the built-in energy-efficient Intel® Centrino® Duo processor technology, the EcoButton extends battery life by powering down idle components and display brightness. You can also simply slot a second battery into the modular bay to keep going even further between charges. And all without compromising performance: the LIFEBOOK S6410 features the latest Intel® Core™ 2 Duo notebook processor for professional computing power, while the integrated Intel® X3100 graphics chipset accelerates your media applications. Finally, the use of Intel® Turbo Memory technology means your programs load faster and your hard drive is accessed less frequently.

We make sure. Our responsibility is to support you in conducting your business efficiently and economically while remaining on the move. As the leading European IT company, we offer a portfolio of exceptional depth, ranging from mobile systems and PCs through servers to enterprise-class infrastructure solutions. www.fujitsu-siemens.com
